(A) Null model distributions
vs observed AUROC
Label-shuffled
Degree-preserving
Observed (0.757)
Density
AUROC
(B) AUROC vs TF degree
(ρ=0.148, p=0.559)
Per-TF AUROC
TF out-degree (TRRUST)
(C) AUROC decomposition:
chance + degree + residual
Observed (0.757)
AUROC
Random
expected
Degree
confound
Above degree
null
(D) Per-TF AUROC distribution:
observed vs degree-null
Observed (mean=0.692)
Degree-null (mean=0.657)
Density
Per-TF AUROC
